WE GIVE A <u>FREE</u> INSPECTION AUDIT

If you are using WIRELESS NETWORKING, you may be vulnerable to sabotage and hacking.

We have become aware that many wireless internet users believe wireless networking is secure. This is far from the truth and a fallacy, as without proper security infrastructure, the site is vulnerable. This is where Digitech can help.

Digitech is a leader in INTERNET WIRELESS SECURITY and wishes to extend its expertise to you by offering a 1-hour free SECURITY AUDIT of your vital operating systems to determine your wireless network security and prevention alternatives before you become another victim for hackers.

You have nothing to lose except an hour of your time for Digitech's specialised security personnel to quickly conduct a free no obligation security check.

Should you wish to avail yourself of this offer, we guarantee complete secrecy by giving you a full non-disclosure agreement for your peace of mind and ensuring your business activities are not compromised.

For your free 1-hour appointment time, please contact Mr Michael Pope on 03 9642 4032.

Yours faithfully

Gary Pope
B. Bus (Acc)

FOR THE RECORD PLEASE NOTE:
We are not sellers of hardware or software (except for small incidentals such as cables). We are independent consultants in the field of computer technology encompassing systems design and appraisals, software integration and troubleshooting. You are free to source equipment or software that is recommended by us from anyone of your choice or alternatively should you choose, we can arrange through or recommend a preferred and trusted supplier.
