**RESIDENTS / BUSINESS OWNERS**  
Of the William Angliss Estate  
Norwest Ave, Oban Court, Weddel Court  
LAVERTON

**With Ref: Backbone Broadband ADSL**  
**“the business grade solution”**  
**Residents go LIVE!**

Dear Resident,

You may be aware of recent advice to you of the results of our efforts in bringing additional cabling services into the area. This was so that ADSL could be provided to give your computing facilities a significant speed and uptime improvement – and at a commercially attractive rate. **Well – it’s LIVE AND AVAILABLE NOW!**

Unlike domestic grade internet services that leave your site many hops from the key services needed, Alchester places you (the customer) one hop from the Telstra 10 Gigabit backbone. As a result, there is considerably less chance of downtime, or loss of operation due to interconnecting service points of equipment along the route between you and any target email/website/server you are connecting to. Other products on the market can place you as many as 23 hops (steps) across the backbone from your destination – and any one of those links, if down or congested, essentially brings your internet experience to a stop.

Alchester products provide a way of minimising such situations, and as a side benefit improve the overall speed of connection and reliability of the service.

The joint initiative taken by **Alchester Business Systems** in conjunction with local Real Estate Agents: **Raine and Horne**, is now providing local residents with excellent quality ADSL facilities – coupled with quality support to give resident business owners all the necessary products, education, connection and proper understanding of their business level internet needs.

**Alchester is now offering vital ADSL services to residents in the area, and welcomes your applications/enquiries.**

Logistics Recruitment Industrial goes live with their ADSL.  
Pictured here: John Traynor (LRI) and Gary Pope (ABS)

Yours faithfully,

**GARY A. POPE**  
Director  
B. Bus (Acc)

**Get in the queue NOW and be one of the first in the street to get ADSL connected!**  
**(It’s live and available NOW!).**
