March 1997

orry that the last two Newsletters have been so lacking in content.

This was due to a shortage of time due to the unfortunate accident to my daughter. However she is now progressing quite well and I hope to be able to now perform my editorial duties to your satisfaction. While on the subject of my daughter, she wishes me to thank you all for the splendid basket of fruit; a basket which was created, with obvious concern, on your behalf, by Pat McCann.

The first two Newletters consisted of two parts; news about people and events in the main section and a Supplements, made up of projects and techniques copied mainly from professional sources. The success or otherwise of this approach can only be gauged by the reactions of the Members, reactions, so far, which have been noticeable by their absence. We would not wish to create and distribute literature which was not needed or considered necessary, so could you please let us have your opinion, even if it is negative, so that we can react as necessary. ?

At the time of preparing this item, the first day of the Festival was behind us and from the point of view of the Kids Corner was an overwhelming success. From around 10 am onwards, there was a constant demand for the attention of all the guys on hand, with the result that we ran out of some items. The success was probably due to two influences, the fact that we were situated in the main event area and that, in my opinion the overall attendance was greater than in previous years.
